Curiosity - checking your response - if you can find the coded message...

Ramblings of a time traveller...

Curiosity killed the alien extra-terrestrial and satisfaction brought it back, most likely through re-incarnation, not necessarily like the previous state, possibly not an alien, but only an out of phase entity, from another realm or astral domain, certainly weird, like from another planet - character, integrity, brilliant technical genius... some escaped from Area 51, by death or astral travel and soul entity regeneration, some flew out of the triangle, the same kind that can fly triangles around you, circles are too simple, except maybe crop circles. "Don't step on the grass" I said, simply amazing to say it once...the rest is classified, unless of course we are squaring the circle, or twist the mobius curve of infinite number crunching, which is a lot different than the other curves we encounter, obviously there is a God, God exists, the creator God, of which of course we are made in the image of God, so we can co-create, build character, express the best of who we are and all that we can be. Why else are we instructed, "Seek you first the kingdom of God."? If you have a difficult time realizing the present reality of the symbols and characters in the search for the holy grail, perhaps you could open your eyes, freeze time, or go forward and backward in time, look for the timeless evidence. This means accepting personal responsibility, as an everyday reality, yes, a space time equation that increases power and levels of trust on an exponential scale, magnitudes of unknown variables, to those who have, more is given, this applies to ability, capacity, knowledge, understanding, perception, awareness, health, energy, individual creative imagination, truth, character, opportunity, mission tasking, everyday duties, going forward with faith, confidence, courage, tenacity, resolution to succeed, focus, self discipline and self control, eternal optimism, the dominant thoughts to create your reality, an alternate reality where your spiritual survival value is immense and everything physical is temporary, part of the personal growth equation, your purpose, your mission, some dynamic, alive exhilarating, extra-ordinary, challenging, adventurous, and by now you must know that there is much more to life than what meets the eyes, knowing of course life starts with the sparkle in the eyes, the creative spark, much like the ember in your soul, with an eternal quest in our hearts, the quest.

Some are now playing with a full deck, and not in a sandbox, or with the sands of time, in fact multiple decks of creation, playing the hand they are dealt, they are cards, encrypted cards, holographic, multidimensional, octaves of music, full spectrum light, they await the signal, an unlock decryption code, without knowing they already possess the key, of course the key is in trust, like everything else, ownership, control, voting, the arsenal of democracy, obviously a riddle is not a puzzle and is not an enigma, unless an autonomous entity might influence, or perhaps decide that a psychotronic mechanism will do fine, and operate at the speed of thought, of course, someone doing astral time travel or being perceptive to say the least, with some luck, maybe at hard work, natural ability, an orchestra of energy fields, time stands still, secrets are known, some have gone on to explore other possibilities, things engineered and envisioned before and after, including soul group re-incarnation, of which some might know from past life recall, secret vaults of time, not necessarily from hypnosis, or what someone else said, they just know in their heart and soul, some become stars, musicians, artists, industrialists, the old school mason, design and build the foundation and super structure, form and pour, dimensional materials levitated and positioned according to plan, secrets and symbols utilized and encoded in space, the building, artifact and objects, things seen and unseen, the carpenter, the woodworker, yes, the woodworking prodigy, hiding in the woodwork, the science of joinery, design elements and geometry, the metal worker, casting, machining, forming and fitting, the fortress in the mountains, metals and minerals, with the transformation of consciousness, like water, something and even somewhere else, one or more, individual creative imagination at work, crystallized thoughts, a transformation of consciousness, insight, understanding, awareness, poof, some are not even hiding, they are there, the real extroverts, pro-active, involved, dynamic, free, some dedicated to a noble cause, some super charged with purpose and desire.

As-Garde Technology Continuum - Curiosity

The desire to transform dreams, imagination, vision, plans and thought, into reality, and all have endeavoured to separate the facts from the fiction, and read between the lines, including telecom lines, some printed on paper and lines in the sand, some carved in stone, even pixelated lines of complex geometry, shimmering consciousness of energy and colour, digital camouflage with subliminal paint by number in your character and consciousness, while others are etched or fused by layer in some exotic advanced materials unseen by common eyes, and everyone works to set the record straight, like a vector, maybe an omni-directional vector, which is a little different than going off on a tangent, unless of course it is tangential railing, and naturally there is a start and stop, a twist on multiple axis of endeavour, multiple points of reference, which brings us to the wheel within a wheel, beautiful geometry of segmented equations alive, not counting time machines, time is not linear, although that is what it feels like, tick, tick, tick, almost like a hockey card ticking on the spokes of a British bicycle hub, you know, nostalgia unlimited, with three or five speed indexing gears, your first lesson in time travel, step back or step forward, just make sure it is in a pair of North Star running shoes, then we can understand each other, the pedal goes round and round, not like a gas pedal, or the throttle in an aircraft, it is you... and there are multiple points of choice in an existing or other timeline you can create by choice, and that option and freedom of choice makes us all question, dream, imagine and act... except in one dream where almost everything else was classified, above top secret, when the introduction by the mystery man said, "This is my daughter!" "That's your daughter!" I said As I have been asked in a dream by the unknown goddess, "What are we going to do now?" Of course I am confronted with the unknown entry event, a multi-dimensional experience, obviously the goddess exists also, and the endless quest to impress her with genius, a genius of solid character and straightforward, or a clever person, gadget happy, hiding true reality... the variable we call "x", yes, let "x" represent the unknown variable, I really am old school... I not only used up the alphabet, I went on to create a language of my own, unless of course it really is so old school and archaic, that nobody knows what it is and would never recognize it, but then again, someone would recognize something, self evident like yesterday, a figure of planetary speech, before we had to spend twenty four hours with the keys to midnight, space time as a child plays, which reminds us all, that if we really do what we like and enjoy, we will never work a day in our lives, at least it will not seem like work, immensely fun, pure exhilaration, the kingdom of magic, the realm of imagination, the universe of possibilities, a galaxy of choices, a world of options, a sphere of influence, a field of energy, pure thought projected into a cosmos of brilliant reality, you are the individual. The individual that could change everything, by expressing the best of who you are, real freedom.

Now this is hard to believe, but we go full circle and arrive back at "Made in Canada" and "Product of Canada". Made with Pride in America. Made in England... This is like the circle of life, but we write on the calendar, we make plans, being, doing, achieving, having, giving, experiencing and much more. Remember when the world and everyday life was full of promise and awesome possibility? Remember when everyday was a chance to explore and discover, to invent the future, to exercise pure imagination? Remember when you are able to make something with your heart and soul, the past, the present, the future, all of it right now. Made with pride, precision, quality, engineering and production genius, there was always money, always jobs and careers, always challenge and reward, always a world of promise and possibility, always the opportunity to feel really alive? Is that too old fashioned and traditional for you?

Of course this is all on a need to know basis, and you need to know this is nothing like the Bible Code, if you want, you can run the program, however, it would be to your advantage to engage the programs of destiny, after all, if you know anything about constellations, you might want to triangulate the possibility wave and probability curve of something extremely intriguing, other than the voluptuous goddess, and the unknown constellation hidden before your very eyes, or quantum geometry in an church of inspired architectural design, with elements of truth, beauty, goodness, character, your destiny may be waiting for you, a life of peak experience beyond anything you can now measure or imagine, but imagination has no limits, and if all you needed was a little encouragement from your soul or someone else, you are free.

It's your move...Freedom, individual creative imagination and the alternate reality creation engine...
